STYLE.

ANOTHER DYSPEPTIC HOMILY.

It doesn't pay now to be born, and it's fearfully expensive to die. It takes an average Old World fortune to come into and go out of life in the New World, to say nothing of living between the two epochs. And every oment of time, style renders the experiment more costly. It's stylish now to pay out not less than \$250 or extra flub-dubs in anticipation of the arrival of a ten-pound chunk of trouble. If it doesn't want to stay, it takes as much more to plant it in the resurrection"turnup"fields. But supose the incarnated bundle of angelsqualls and paregorical botheration concludes to tarry, and hangs on to life for a quarter or a half century? Who would foot the funeral bill for ess than a town corner lot or an unneumbered farm? The foolish exense doesn't add to the comfort of he defunct, but style demands that the dead who die in society must be pistol. ashionably laid away. Next door to the man who has a fortune to ex- taxes in June. It costs something to enpend for birthing and deathing, resides a family who live in dread horror of having a similar financial calamity come upon their limited bank account. It's not the fear of death, but the fear of a slim, carriageless. poor-folksy funeral that is destroying the quiet of mind of those who might otherwise die peacefully, yea cheerfully. To be out of life is bad enough, out to be out style is worse. To and three-quarters, and several weighed have to weep at the grave is uninviting, but to have society's smart brats

laugh at your slim cortege from the straddled top-rail of front fences, as you pass out of town on that con templative occasion, is what worries von into grave material long before they had their origin, and have outhyed been false times. Verily, it has come to pass,in these false times, that no poor nan can afford to die himself, or bury his family. At least, he can't expect ontrol of both branches or Congress and to do it with any credit to himself or satisfaction to society. And, as to getting married, why that is out of the question. It takes s sum beyond the ability of any or-

dinarily well-to do person. It costs as much to marry in style one day as to live single always. And that s why widows and widowers never try it on again. Only young gos lings and geeselings, who can't imagine what it costs, ever voluntarily take upon themselves such a bankrupting expenditure.

Here, then, the human race has repeal all laws that favor capital to the doesn't pay to be born ; it's too expensive to marry; and as to dying, in sublimest folly. Henceforward there It is said that many of the these stylish times, nobody is stupid come of us? TALE OF A HORSE TAIL.

(From an Exchang

We had a good deal of trouble with our horse last summer. He was a bob-tailed horse, and it seemed to annoy him so much that he couldn't reach the flies which fat tened on his ribs, that it occurred to us to fix him up a kind of an artifi- WE HAVE IN OUR YARD A GOOD STOR cial tail to relieve the situation, as it were. So we procured three feet of half-inch rope, unraveled about eighteen inches of it, and spliced the other end to the borse's tail. This would have enabled him to switch fly off his nose as soon as he had equired a little practice. But our Irishman, seeing the rope, and not 1873. NEW GOODS! 18 understanding our move precisely concluded that we were trying experiments with some new kind of hitch ing strap to be used in the rear, and so he tied the horse to the stall that night by his artificial continuation By morning the feed-box was kicked to kindling wood, and the horse wa

while he chewed up four of the bes

boards in the side of the stable in

front of him. Then we got him up

another rope tail, and explained the

theory to our man.

But the tail bothered the hostle so much while currying the horse that he tied half a brick to it to hole it still. The consequence was that the horse, in a moment of excitement, jerked the brick around and mashed in the Irishman's nose, and he sued us, and we spent two hundred dollars trying to settle the case. Then we bought a bunch of horse hair, and spliced that on very neatly. When our new man came he began to curry that tail, and it came off in his hand. He dition of the horse, and gave him a huge dose of some kind of patent power to improve the animal's health, and in half an hour the horse had convulsions, during which he kicked down the stable door, battered the stall into splinters, ham mered four more boards out of the ATTENTION partition, dislocated his off hind leg. and died in frightful agony. Now we have a horse with a long tail,

shot-gun. A LIVELY SEWING MACHINE.

out to interview him, and bombard

[From an unknown Exchange. A Mr. Peck had long entertained he idea that he could invent a self acting sewing machine, and he did He procured a steel ribbon spring about twenty feet long, and of suffi cient power to run a horse-car. This he rigged to his wife's sewing machine with a lot of clockwork, and it appeared to him, when he finished the job that evening, that he had realized his hopes. If any sewing machine would go that one would, so between the hours of nine o'clock in the noon and live o'clock in the afternoon of ly on a harbor bathing party. Two hundred naked boys were chased through the dred naked boys were chased through the o'clock Mrs. Peck aroused him and told him to listen to the burglars in bidder, for cash in hand, all the most terrific racket in the sitting-room. It appeared to him that there room. It appeared to him that there must be a million burglars refreshing themselves with a prize fight. So he loaded his gun, crept softly over, and peeped through a crack in the door. It was not burglars; it was Mrs. Peck's sewing machine. The peg had slipped out and that spring was the lost of the continuing in the softly containing in all lists wenty-seven (27), and all containing two themselves with a prize fight. So he loaded his gun, crept softly over, and the loaded his gun, crept softly (50), range twenty-seven (27), and a loaded his gun, crept softly (50), range twenty-seven (27), and a loaded his gun, crept softly (50), range twenty-seven (27), and a loaded his gun, crept softly (50), range twenty-seven (27), and a loaded his gun, crept softly (50), range twenty-seven (27), and a loaded his having full play. It would rear the B machine up on one end and charge it three or four times like a battering ram against the glass front of the book-case; then it would wheel around and suddenly tear across the room, and butt up against the mantle-piece, and it would lie down and roll over the floor, and hammer the sofa, tear up the carpet, and burst the center-table and try to jam a heads down to the soldiers, who caught the center-table and try to jam a hole through the wall, and then endeavor to leap up on the chandelier Then as Peck entered the room, it flew at him, and tore in and out be tween his legs, the wheel revolving like lightning all the time, and the

chine, and sat on it for a awhile, but of said note, now, therefore, by vir finally pushed it out of the window and at the request of the legal hole. under the heap it kept up a continual
